

Atobarriome

NEW

Rebalance of skin microbiome

INCI & CFDA

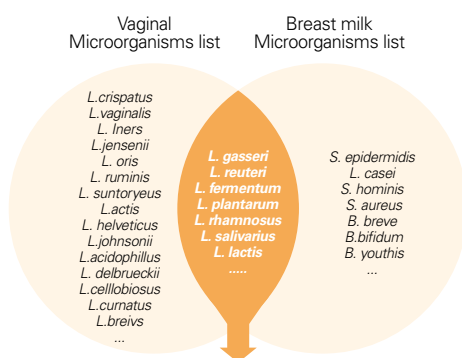

Lactobacillus ferment, Propanediol,
1,2-Hexanediol

Benefit

Anti-itching, Skin barrier & Moisturizing, Anti-inflammation, Rebalance of skin microbiome

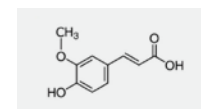

Atobarriome is a fermentation extract made up of beneficial bacteria fermentation solution through the blueberry ferment. It promotes the growth of beneficial bacteria in the skin and improves the skin barrier, helping to enhance the skin through inflammation relief.

New solution

LABIO & PMC collaborative research proceeds

Lactobacillus rhamnosus

Ferulic acid / Lactic acid /
Butyric acid / Acetic acid

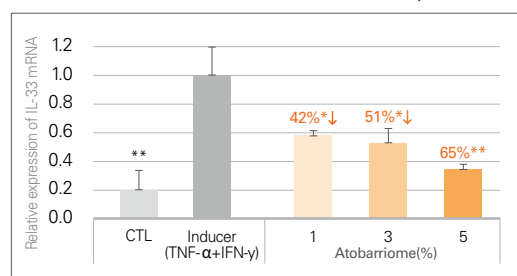

Microorganisms extracted from blueberries and fermented using LABIO's technology result in a fermented extract. Ferulic acid in this extract helps alleviate discomforts like inflammation and itching.

Feature

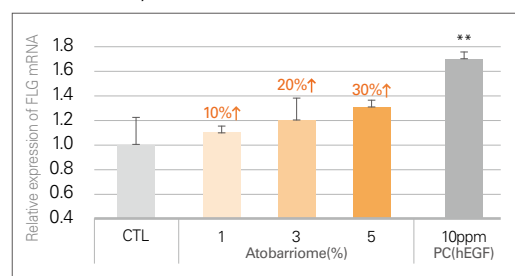

In-vitro test

Inflammation

1% Atobarriome inhibits inflammation factor by 42%

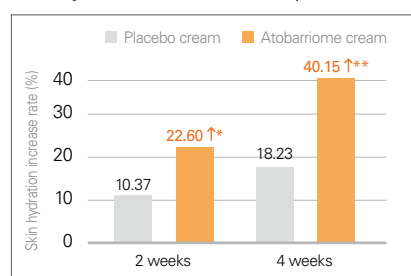

Skin barrier & Hydration 1% Atobarriome improves skin barrier factor by 10%

Clinical test

Skin hydration Atobarriome improves skin hydration by 40%

Skin roughness Atobarriome enhances the barrier to improve skin texture.
