

BlockACNE NEW

Total care solution to solve 4 acne factors

INCI & CFDA

Lactobacillus ferment, Bacillus ferment, Pentylene glycol, Water, Glycerin, Pyrus Malus (apple) Fruit Extract

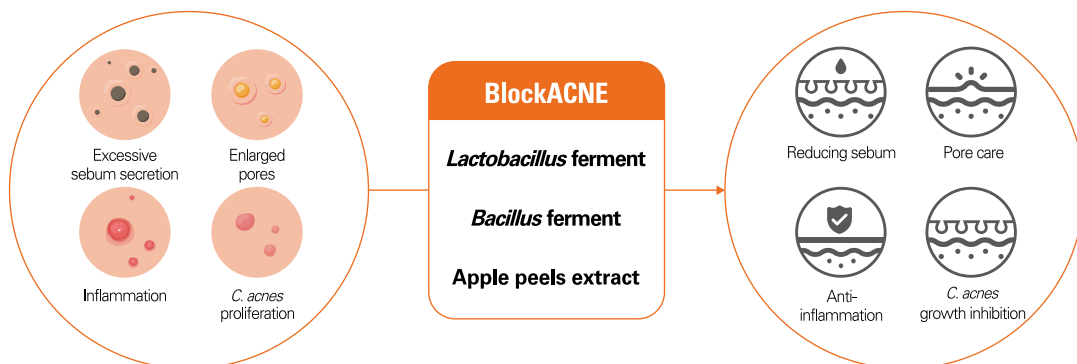

Benefit

Acne alleviation, Anti-inflammation, Sebum reduction, Pore care

A product that provides a total solution for acne through effective inhibition of the growth of acne bacteria through *Lactobacillus* ferment, anti-inflammatory effect and sebum control effect using *Bacillus* ferment, and promotion of procollagen synthesis and pore care effects using upcycled apple peels material.

New solution

Total acne care solution

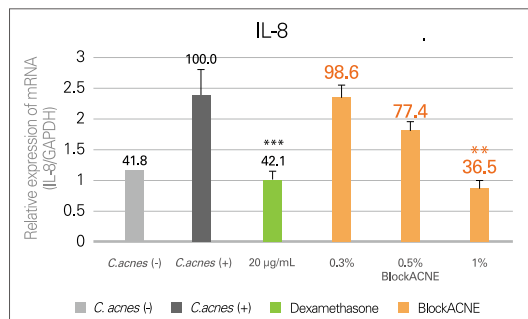

PATENT *Lactobacillus* ferment boost skin defense by inhibiting acne-causing bacteria.

PATENT *Bacillus* ferment prevents clogged pores by reducing inflammation and controlling sebum.

Feature

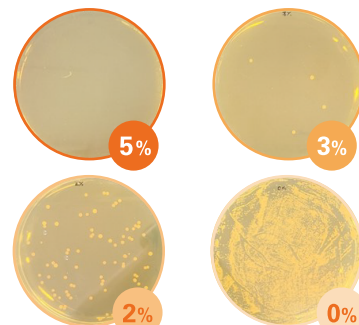

In vitro assay

Anti-inflammation (IL-8)

BlockACNE inhibits the expression of IL-8.

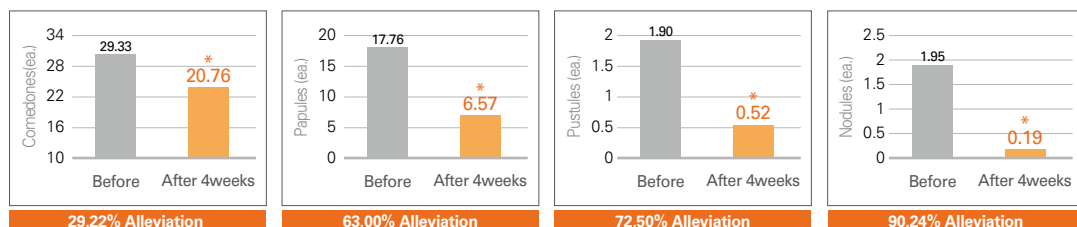

Growth inhibition (*Cutibacterium acnes*)

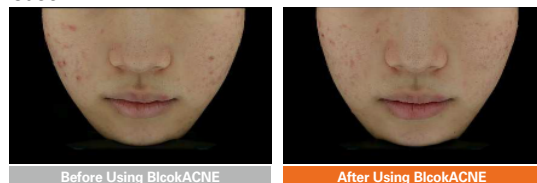

BlockACNE has high growth inhibitory effect against *C. acnes* bacteria.

Clinical test

3% BlockACNE serum reduces non-inflammatory lesions (Comedones) and inflammatory lesions (Papules, Pustules, Nodules) when used for 4 weeks.
